

Water Line Improvements

Community Development Block Grant

You have heard us talk about it! It is finally here. In 2016 Robbins was awarded a 2 Million Dollars grant to upgrade our water system. We are set to begin construction late April 2019. The map shows to the left shows most of the areas/upgrades we will be working on under this project. These improvements will change the pressure systems and increase water pressure around our area schools and residential areas. We will be upsizing the lines in other residential areas of town as well. This will have a positive effect on water quality and replace very old and undersized lines throughout town. If you would like to see a bigger copy of this map please visit Town Hall at 101. North Middleton Street or look online at www.townofrobbins.com

Water Quality Improvements

Chlorine Booster Station/Tank Mixers

We will begin the process of moving our chlorine booster pump station to town and installing mixers in our water towers. This will reduce the risk of disinfection byproducts in water and improve water quality.

Waste Water Improvements

Hurricane Florence

During Hurricane Florence Robbins suffered significant damage to our waste water plant and main pumping station. Robbins was able to secure some funding to obtain some much needed equipment to help with emergency response and we were given \$1.6 Million (zero interest loan) to provide enough cash to allow Robbins to repair and replace this infrastructure and await reimbursement from FEMA.

Timeline:

Construction projects are subject to change. Updates to this timeline will be posted on www.townofrobbins.com and posted at Town Hall.

Construction is scheduled to begin in April 2019 and should be substantially completed by November 2019. All efforts are being made to ensure that the disruption of citizen's daily activities are minimized.

Work will require some roads to be temporarily closed, but alternate routes will be posted and announced.

If you experience low water pressure or notice a hazard please contact us.
